Technical description

Crawler travel gear

Frame	Self-manufactured, torsion-resistant box-type design of high-tensile grain refined steel, comprising crawler centre section and two crawler carriers. The crawler carriers are pinned hydraulically.
Travel gear	Maintenance-free, dirt-protected crawler travel gear with 3'11" (4'11" optional) track pads and centralized lubrication system for tumbler and track roller bearings.
Travel drive	1 (optionally 2) hydraulic drives per crawler carrier, comprising axial piston variable displacement motor, planetary gear with spring-loaded, hydraulically releasable travel brake and tumbler. The crawler chains are controllable synchronously, independently and opposed to one another.
Central ballast	94800 lbs, consisting of 2 slabs 12130 lbs each and 4 slabs 17640 lbs each.

Crane superstructure

Frame	Self-manufactured, torsion resistant weldment of high-tensile grain refined steel. Connected to crawler travel gear by a 3-row roller slewing rim for 360° continuous rotation.
Crane engine	6-cylinder turbo-charged Liebherr Diesel engine, type D 9406 TI-E A3, water-cooled, output acc. to DIN 300 kW (408 h.p.) at 1900 rpm, max. torque 1261 lbs-ft at 1400 rpm. The engine corresponds to the EU directive 97/68/EG step II and is certified acc. to EPA/CARB and Tier 2. Fuel reservoir 185 gallons.
Crane drive	Diesel-hydraulic by pump distribution gear with 4 axial piston variable displacement pumps with capacity control within closed oil circuits.
Crane control	Servo-control with electronic synchronizing device by three four-way control levers and two two-way control levers (joy-stick type). Continuous control of the crane motions by variation of the hydraulic pumps, additionally by variation of the Diesel engine speed.
Winches 2 and 4	Hydraulically driven cable drums by axial piston variable displacement motor and planetary gear with spring-loaded, hydraulically releasable static brake. Wearfree braking function during lowering by closed oil circuits. Winch 2 – hoist gear, winch 4 – derrick gear. Auxiliary winch for reeving of cables.
Slewing gear	2 slewing gears (optionally 4), hydraulically powered by axial piston variable displacement motor and planetary gear with spring-loaded, hydraulically releasable static brake. Wearfree braking function by closed oil circuits.
Crane cabin	Spacious, all-steel construction cabin, swivelling sideways and tiltable backwards, with operating and control instruments. Self-contained warm-water heating (optionally air-conditioning system).

Safety devices	LICCON safe load indicator, hoist limit switches, electronic inclinometer, safety valves for the prevention of pipe and hose ruptures, anemometer.
Electrical system	24 V DC, 2 batteries of 170 Ah each.
Superstructure ballast	297700 lbs, consisting of 1 base slab of 33100 lbs and 12 slabs of 22050 lbs each.

Boom system

Heavy version

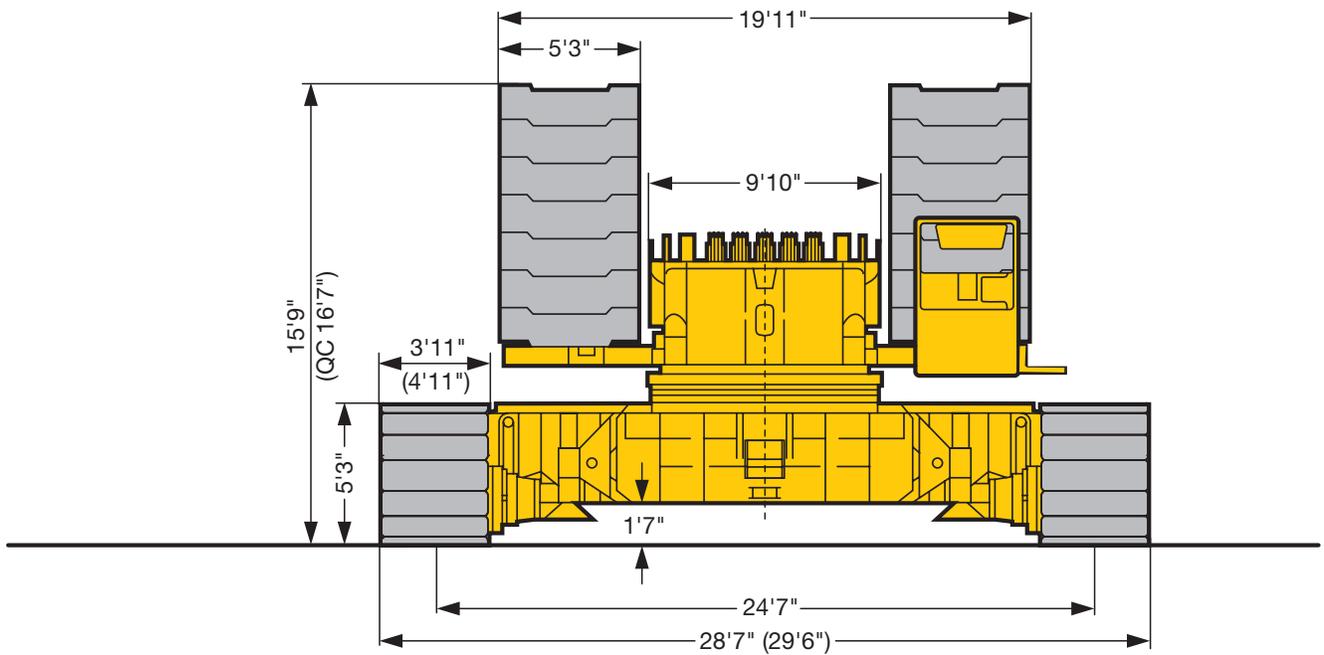

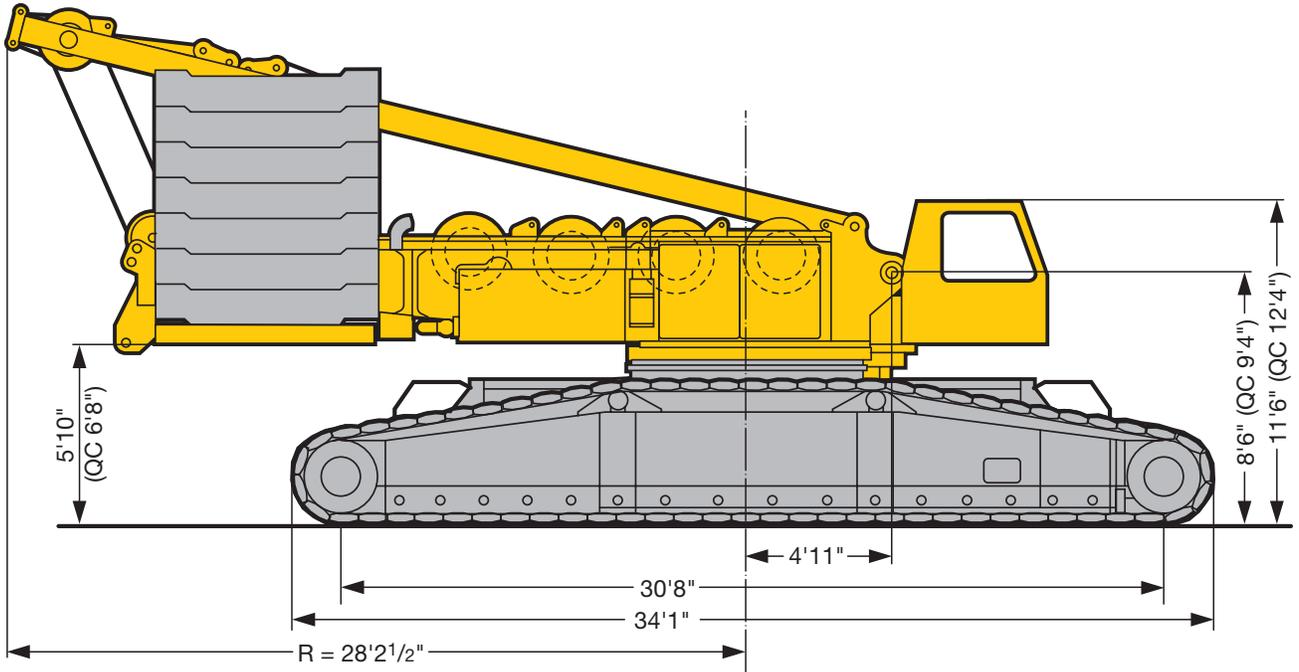

SL – main boom	SL 69 ft – 367 ft (SL 322 ft – 367 ft only with derrick), system 2620.20 / 2620.10, base section 44', intermediate sections 23' and 46', head adapter 23', 550 kips (optional 770 kips), head section 2', safety retaining ram.
N – luffing fly jib	N 69 ft – 299 ft, system 2115.10 / 1812.10, base section 31'2", intermediate sections 23' and 46', reducing section 11'6", 286 kips head section 26'3", retaining device, NA-frames 1 and 2.
H – fixed jib	H 34 ft – 80 ft, system 1812.10.
D – derrick boom	D 92 ft, system 2125.20, base section 34'5", intermediate section 23', head section 34', derricking block, safety retaining ram.
B – suspended ballast	Suspended ballast pallet with compensating rams and hydraulic telescopic guiding device for max. 573000 lbs derrick ballast at max. 49'3" counter-radius.

Optional equipment

Winches 1, 3, 5 and 6	Winch 1 – hoist gear, winch 3-luffing main boom/D-mode, winch 5 – variation of luffing fly jib, winch 6-additional hoist gear.
Ballast	Superstructure ballast 341800 lbs, additionally 2 slabs of 22050 lbs each. Suspended ballast B 550000 lbs, 25 slabs of 22000 lbs each for a total of 573000 lbs derrick ballast.
Mechanical additional support	For the erection of long boom configurations without derrick ballast.
Hydraulic mounting supports	For raising the basic machine during assembly/disassembly.
Mounting rams crawler carriers	For self-assembly/disassembly of the crawler carriers by the crane.
Portable pin pulling device	For the assembly/disassembly of the pins of the crawler travel gear and the boom pin intermediate sections.
Quick Connection	Rapid coupling system to facilitate separation of the superstructure from the crawler travel gear.
Whip line	Whip line 79400 lbs to be fitted to L-, N-, S-, W-head. Whip line 132200 lbs to be fitted to L-, S- and W-head.

Further equipment items on request.
